

The Management of SCITEK Consultants Ltd. are committed to delivering excellence in turnkey engineering solutions to meet the specific needs of our clients. We are aware of both the external and internal risks that may affect this delivery and realise that these should be reviewed and monitored, throughout the company, on a regular basis.

Through strategic leadership and regularly reviewed objectives, SCITEK will give careful attention to customer needs, including on-time services, competitive prices, service quality and continual quality improvement. This is endorsed by the provision of a quality management system, subject to internal and external audit at regular intervals.

The scope of SCITEK's quality management system covers Research and Development Services, incorporating modelling, design, manufacturing, data gathering and processing, instrumentation and testing of mechanical and electrical systems.

All policies and procedures have been structured to meet the requirements of BS EN ISO 9001:2015. Each member of staff is aware of SCITEK's commitment to quality and is required to observe our quality requirements at all times.

This policy will be made available to all interested parties.
