

Software Engineer

About us

SCITEK Consultants Ltd is a Small to Medium-sized Enterprise (SME) based in Derby and has been in business for over 25 years. Our mission is to provide innovative R&D services to help develop and test our customers' products. Our portfolio includes countless projects for key players in the aerospace, rail, pharmaceutical industry and we are now increasingly engaging in projects in renewable energy. We have a reputation for delivering high quality work based on a diverse range of technical knowledge. Our clients come to us with a wide range of challenging projects which typically include aspects of mechanical design, electrical design and software development.

Innovative

We do not shy away from never before done projects.

Top Class

We are the best in class at delivering our services.

Confidential

We take customer confidentiality very seriously.

Collaborative

We are open minded about our solutions and can help our customers map out requirements.

To meet increased demand within the UK and abroad the company is growing and looking to recruit a **talented** and **highly motivated** engineer. The successful candidate will get the opportunity to work on all aspects of **exciting, fast-paced projects**, gaining valuable experience in a wide range of engineering areas. This role will involve working on multiple projects simultaneously within small teams to design, manufacture and commission **bespoke test equipment**.

Job description

This is a multi-disciplined, diverse role, which drawing on your areas of specialism could include (but is not limited to):

- **End to end involvement** in projects from costing to commissioning.
- Software development for **instrumentation and control systems**.
- System architecture design and implementation.
- Hands on **system testing, debugging and commissioning**.
- Working on **multiple projects** both independently and as part of a team.

Candidate requirements

Minimum:

- Minimum degree qualification or industry experience in software, control systems development or mechatronics.
- Experienced user of LabVIEW and/or Python.
- An effective and professional communicator.
- Be highly motivated to learn and keen apply their knowledge to new areas.
- Have good practical and problem-solving skills.
- The ability to see projects through from conception to completion.

Candidate requirements

Desired:

- PLC programming (Allen Bradley/Siemens).
- Experience with C++/Rust/JavaScript/TestStand.
- Electrical design, specifically industrial control and data acquisition.
- Knowledge of National Instruments hardware.
- Experience with selecting COTS hardware (Instrumentation, control etc) to meet requirements
- Project management skills to ensure projects run smoothly and on time.

Company benefits

We offer a friendly working environment in Derby. We offer some flexibility and the ability to work from home but we believe we are more effective as a team and problem solving together. Company benefits include:

- A competitive salary
- Both formal and on the job training
- Competitive company pension contributions
- Private medical cover
- 25 days annual leave + bank holidays + discretionary Christmas shutdown
- 40 hour working week (primarily office based) with flexible start/finish times

Security clearance

Please note that Security clearance via Experian Background Checking Services will be required if the candidate is offered the role.
